Flutter Packages/Projects

super_extensions, *Flutter Package*
super_extensions is a package that contains different widely used extension methods. This package/project is completely open-source so anyone can freely open a PR if you feel something is missed out.

https://pub.dev/packages/super_extensions

contactus, *Flutter Package*
I have published my first ever package in Flutter named contactus. It helps the developers to easily add their contact details in the app.
https://pub.dev/packages/contactus

parent_child_checkbox, *Flutter Package*
Parent Child Checkbox is a type of checkbox where we can establish a hierarchy in Checkboxes.
https://pub.dev/packages/parent_child_checkbox
